Rainbow Sudoku: 1-9 in each row, column, and block, and in each collection of same-colored cells; for example, the nine yellow cells contain 1-9.
Product Sudoku: 1-9 in each row, column, and block, where the number in each shaded region is equal to the product of its entries.
18-Clue Sudoku: 1-9 in each row, column, and block. 18 is the fewest number of clues conjectured to be possible in a rotationally-symmetric puzzle. Lightning Sudoku: 1-9 in each row, column, block, and lightning bolt. Grey Sudoku: 0-9 in each row, column, $2 \times 5$ block, and grey shaded region. Tile Sudoku: 1-5 in each pentomino region and 1-5 each twice in each row and column.
